SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

Self-protection of the first aider

Inhalation

Skin contact

Eye contact
Ingestion

Asphyxiant in high concentrations. Avoid inhalation of high concentrations of gas. Eliminate sources of ignition. Use personal protective equipment as required. The vapour is heavier than air; beware of pits and confined spaces. If it is suspected that fumes are still present, the responder should wear an appropriate mask or self-contained breathing apparatus.

Asphyxiant in high concentrations. IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical advice/attention if you feel unwell.

No hazard expected under normal conditions of use. Get medical advice/attention if you feel unwell.

Not irritating to eyes. Get medical advice/attention if you feel unwell.

Oral exposure is considered to be not relevant.

Rinse mouth. Do NOT induce vomiting. Get medical advice/attention if you feel unwell.

4.2 Most important symptoms and effects, both acute and delayed

In high concentration the gas may cause a suffocation. Victim may not be aware of asphyxiation.

4.3 Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

Notes to a physician: Exposure to significant quantities may cause delayed pulmonary oedema.

SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media

Unsuitable extinguishing media

As appropriate for surrounding fire. Foam, CO2 or dry powder

Do not use water jet. Direct water jet may spread the fire.

5.2 Special hazards arising from the substance or mixture

Compressed gas

Not flammable. Does not support combustion. The vapour is heavier than air; beware of pits and confined spaces.

Contains gas under pressure; may explode if heated. Sealed containers may rupture explosively if hot. Do not pierce or burn, even after use.

5.3 Advice for firefighters

Fight fire with normal precautions from a reasonable distance. Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Keep containers cool by spraying with water if exposed to fire.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Shut off source of leak if safe to do so. Eliminate all ignition sources if safe to do so. Ensure adequate ventilation. In case of inadequate ventilation wear respiratory protection. Wear suitable protective clothing. Contaminated clothing should be thoroughly cleaned. The vapour is heavier than air; beware of pits and confined spaces.

6.2 Environmental precautions

Avoid release to the environment.

- 6.3 Methods and material for containment and cleaning up**
- Small scale
Large scale
- 6.4 Reference to other sections**
- Only trained and properly protected personnel must be involved in clean-up operations. Ensure adequate ventilation. Isolate the area and allow gas to disperse.
Allow gas to disperse naturally in a well-ventilated area. Prevent access until ventilation has restored safe oxygen level. (>19.5% O₂).
Evacuate area. Fight fire remotely due to the risk of explosion. Notify police and fire brigade as soon as possible. Prevent access until ventilation has restored safe oxygen level. (>19.5% O₂).
See sections 8 and 13

SECTION 7: HANDLING AND STORAGE

- 7.1 Precautions for safe handling**
- 7.2 Conditions for safe storage, including any incompatibilities**
- Storage temperature
Incompatible materials
- 7.3 Specific end use(s)**
- Do not handle until all safety precautions have been read and understood. Filling, connection and handling should only be carried out by trained personnel. The vapour of the product is heavier than air and may accumulate below ground level, in pits, channels and basements in higher concentration. Avoid inhalation of high concentrations of gas. Ensure adequate ventilation. In case of inadequate ventilation wear respiratory protection. Do not open valve until connected to equipment prepared for use. Close valve after each use and when empty. Do not eat, drink or smoke at the work place. Wash contaminated clothing before reuse. Wash hands before breaks and after work.
Store in a cool/low-temperature, well-ventilated (dry) place away from heat and ignition sources. Keep container in an upright position.
Keep cool. Protect from sunlight. Do not expose to temperatures exceeding 50 °C.
Isolate from reducers and flammable/ combustible materials etc in storage.
